FOREWORD.

When for any purpose one sets out to read agricultural books of early date it is natural that the British Museum Library should be regarded as the obvious place in which the books may be most readily found. It is, however, felt that its resources should be used only when it is necessary to consult books inaccessible in other specialized or general libraries.

For those who require agricultural works there are at least three libraries which can be used. The Library of the Royal Agricultural Society of England, at Bedford Square, contains a large collection of early farming books, and a unique collection of 18th century pamphlets on the various subjects relating to agriculture which were then so widely discussed. The Rothamsted Experimental Station, Harpenden, also possesses a great deal of material for the students of agricultural development in this country, and this has been catalogued by Miss Mary S. Aslin.

A third Library, that of the Ministry, also contains a collection of early agricultural works which can be consulted. These books, however, are valuable, and they are not available for loan as are the modern works in the Ministry's possession. This Library has recently been enriched by the presentation of "The Cowan Memorial Library," a unique collection of books relating to bees and allied interests, the generous gift of the British Bee-Keepers' Association. There is, of course, a card catalogue of the books in the Library, but no catalogue has been published. With the idea of making public the facilities for research which are available in the Ministry's Library, the appended Catalogue has been prepared by Mr. G. E. Fussell, one of the Ministry's officers. It was, however, completed in November, 1929, and, since acquisitions by purchase and by gift accrue, it would be well for interested persons, when using it, to consult the list of additions published from time to time in the Ministry's *Journal*.

It may be added, perhaps, that the attached Catalogue will show that the Ministry's collection of early agricultural books does not pretend to be complete, and that many of the works are only second, third or later editions. These are defects which can only be remedied in such a comprehensive and universal library as the national collection in Bloomsbury.

Ministry of Agriculture and Fisheries,
10, Whitehall Place,
London, S.W.1.

January, 1930.

CHRONOLOGICAL LIST OF EARLY AGRICULTURAL WORKS IN THE MINISTRY'S LIBRARY.

NOTE.—Where a volume is not a first edition, the date of publication of that edition, if known, is shown in brackets in heavy type.
